

Configuring and using the VPN of UPC with 2FA

(MyUPCLink) Windows

Authorize the use of 2FA

- First time you want to use MYUPCLink, go to:

<https://sso-2fa.upc.edu/>

and give your consent

Step 1 – Installing authentication app

Android

- o Install the **2FAS Authenticator** app from:
<https://2fas.com/>
- o Open a web browser and go to:
<https://sso-2fa.upc.edu/>
Validate your UPC identity if necessary.
- o Click on “Activate double factor authentication”
- o Click on “Step 2 – In-app settings” The QR Code is showed
- o Run **2FAS Authenticator app**
- o Click on “+” symbol and click on “Scan QR Code”
- o Point over QR code showed in the web browser

Step 2 – Install MyUPCLink client

Windows

- o Download and install **FortinetClient VPN only** from:
<https://www.fortinet.com/support/product-downloads#vpn>
- o Create a new connection and introduce next data:
 - Connection name: **VPN UPCLink**
 - Remote gateway: **myupclink.upc.edu**
 - In Customize port: **443**
 - Tick **Enable Single Sign On (SSO) for VPN Tunnel** option

You can get more information at:

<https://serveistic.upc.edu/ca/upclink/documentacio>

The most common processes in our environment with MyUPCLink are:

Stablishing a VPN connection

- Run your **FortiClient** (Windows)
- Click on **SAML Login** button
- Introduce your regular **username** and **password** of the UPC environment.
- In the next screen, system asks you for a **verification code**. Run your authentication app (Android) to obtain the code.

Connecting by remote desktop to a windows computer

- Establish a VPN connection.
- Run **Remote desktop**: **Start – Programs – Windows accessories – Remote desktop connection**
- In the logon screen, enter with your remote computer account.
The syntax of the remote account is:

ieb-eel\your_username_in_ieb-eel_domain

Accessing to an UPC service that requires 2FA

- Log in to the UPC environment with your regular UPC user account

The screenshot shows the login interface for the Universitat Politècnica de Catalunya (UPC). At the top right, there are language options: 'Català | Español | English'. The UPC logo and name 'UNIVERSITAT POLITÈCNICA DE CATALUNYA BARCELONATECH' are displayed. Below this, there is a username field containing 'alfonso.mendez' and a password field with masked characters. A checkbox with a question mark icon and the text 'I want to remember my password' is present. A large blue 'Login' button is at the bottom of the login section. Below the login section, there is a section for 'Other authentication methods' with an information icon. It includes a 'Digital certificate (T-CAT P, FNMT, DNle)' option with a corresponding icon.

- When you access the service, the system asks you for a verification code.
Run the authentication app, introduce your password if necessary, and the verification code will be generated.

The screenshot shows the verification code screen. It features the UPC logo and name 'UNIVERSITAT POLITÈCNICA DE CATALUNYA BARCELONATECH' at the top. Below this, the text 'Verification code' is displayed. A large input field contains the code '123456'. At the bottom right, there is a link with a question mark icon and the text 'How to get the code'. A large blue 'Entra' button is at the bottom of the screen.
